

# The Queensland Pacific Metals TECH Project Drop-In, Community Information Session

Tuesday 30 April 2024

QPM Townsville Energy Chemicals Hub (TECH) Project will be holding a community information session to provide a project update as the project design progresses.

The Project involves the design, construction and operation of a new environmentally sustainable, high-grade battery materials refinery, within the Lansdown Eco-Industrial Precinct. There is a growing demand for sustainably produced battery materials, for renewable energy projects and electric vehicle production.

The Project has primary approvals from Commonwealth Department of Climate Change, Energy, Environment and Water, Townsville City Council, State Assessment and Referral Agency and the Department of Environment and Science.

Project team members will be available at the drop-in, community information sessions to provide more information and answer questions. Light refreshments will be provided. The team looks forward to welcoming the community on the day, noting there is no requirement to confirm your attendance prior to the day.
